

Bulletin: Updates on Maryland’s COVID-19 Vaccine Plan (**Week 21 Allocation**)
To: All COVID-19 Vaccine Providers Registered in ImmuNet, including but not limited to Hospitals, Federally Qualified Health Centers (FQHC), and Local Health Departments
From: Bryan Mroz, Assistant Secretary, Maryland Department of Health (MDH)
Date: April 30, 2021

- Please review the latest [Vaccination Matters Order \(03/22/2021\)](#). We encourage every provider to make use of every resource to ensure a successful vaccination campaign.
- **All COVID-19 vaccine providers are required to administer COVID-19 vaccine according to the following updated guidance.**
- **This document updates and supersedes the COVID-19 vaccine bulletin (Week 20), dated April 23, 2021 and earlier bulletins.**

TABLE OF CONTENTS

Updates & Reminders	2
1. Vaccine Eligibility	3
2. Residency and Priority Group Eligibility Determinations	3
3. Vaccine Operations	4
4. CovidVax.Maryland.gov	5
5. Second Doses	5
6. Wastage/At-risk Vaccines	7
7. Transfer of Doses from the Original Provider	7
8. Additional Local Health Department Guidance	7

Updates & Reminders

- **REMINDER: All COVID-19 vaccine providers shall continue to prioritize Marylanders who are 65 and older.**
- **Vaccine Updates:**
 - **Following federal guidance, Maryland has resumed allocating Johnson & Johnson vaccines. Please see this document's appendices for more details on allocation numbers for all vaccines.**
 - **J&J providers are reminded to follow the guidance outlined in Section 3 below.**
 - **Local Health Departments:** Please see the four-week projection of vaccine allocation to all local health departments (Appendix 1, attached).
- **Provider Updates:**
 - As of Monday, April 12, Maryland moved into Phase 3 making all Marylanders 16 and older eligible to receive a COVID-19 vaccine from any vaccine provider.

Note: Only Pfizer has been issued Emergency Use Authorization for use in individuals 16 and 17 years of age. Per federal guidance, all vaccine providers are directed to disclose the vaccine type they are administering to individuals at the time of scheduling their appointments.

1. Vaccine Eligibility

- All Marylanders 16 and older are now eligible to receive a COVID-19 vaccine. All COVID-19 vaccine providers shall continue to prioritize Marylanders who are 65 and older.

Note: Please see Appendix 5 for the full list of Maryland's Vaccine Eligibility Phases.

2. Residency and Priority Group Eligibility Determinations

- All COVID-19 vaccine providers shall take reasonable steps to determine if an individual qualifies under the eligible priority groups. A COVID-19 vaccine provider may require additional documentation or employee identification and may require that organizations submit institutional plans with identified individuals. **Any requirements must be applied consistently to all individuals with an appointment.**
- **A COVID-19 vaccine provider may not refuse an individual a vaccine based on their citizenship or immigration status.**
- We prefer that Marylanders are prioritized for getting a vaccine allocated to us by the federal government; however, Maryland will not turn away a person from out of state who needs a vaccine.
- Individuals should be vaccinated according to the joint District of Columbia, Maryland, and Virginia statement (see below).

The District of Columbia, Maryland, and Virginia are committed to vaccinating eligible residents and out-of-state workers as equitably and efficiently as possible, based on limited vaccine supply from the federal government.

Individuals who are currently eligible for vaccination based on their occupations should first check with their employers to see if vaccination arrangements have already been made. If not, they should contact the local health department in the localities *where they work*. These individuals are at high risk of exposure to COVID-19 based on where they work.

Individuals who are currently eligible for vaccination because they are age 65 or older, or because they have high-risk medical conditions identified by the CDC, should contact the local health department in the localities *where they live*. These individuals are at high risk of serious illness if they contract COVID-19.

There are simply not enough doses available yet for everyone who is eligible to receive them. That means it may be weeks or longer before vaccination appointments become available for those who are eligible and

have registered. Anyone who receives a first dose of vaccine will receive the second dose three or four weeks later as appropriate.

- **Non-discrimination:** The Maryland Department of Health complies with applicable Federal and State civil rights laws and prohibits discrimination on the basis of race, color, religion or creed, sex, age, ancestry or national origin, marital status, physical or mental disability, sexual orientation and gender identity, genetic information, socioeconomic status, and/or any other protected status. The Maryland Department of Health prohibits the exclusion and favorable/unfavorable treatment of any individual in the aforementioned protected categories based on an individual's medical knowledge of and/or experience with a vaccine's efficacy, longevity, reduced side effects, or any other characteristic associated with the performance of an administered COVID-19 vaccination. **An individual's protected status shall have no bearing on the type of vaccine an individual receives.**

3. Vaccine Operations

- All COVID-19 Vaccine Providers shall: Register in ImmuNet to potentially be allocated a vaccine at:

https://phpa.health.maryland.gov/OIDEOR/IMMUN/Pages/quick_ref_guides.aspx

NOTE: Registration does not guarantee the immediate allocation of the vaccine. Allocation is dependent on vaccine supply.

- All COVID-19 vaccine providers shall submit allocation requests to MDH by 2:00 p.m. every Tuesday at mdh.covidvax@maryland.gov. Requests from providers who have not administered at least seventy-five percent (75%) of all of their total dose allocation received to date will not be prioritized in the subsequent week's allocation. Because vaccine doses are still severely limited, MDH cannot guarantee that requests will be granted under any circumstances.
- **Pfizer 6th Dose:** Per updated [federal guidance](#), all vials of Pfizer contain 6 vaccine doses. Providers that are unable to get a sixth dose from each vial will need to report the sixth dose as wastage using the process outlined in Section 4, Wastage. Additional Pfizer details can be found here:
<https://www.cdc.gov/vaccines/covid-19/info-by-product/pfizer/index.html>
- **Johnson & Johnson COVID-19 Vaccine:**
 - i. All vaccine providers who receive J&J vaccine **shall:**
 1. Comply with the FDA emergency use authorization conditions and recommendations;

2. Develop internal use and administration guidelines for offering the J&J vaccine in conjunction with any other allocated vaccine as clinically appropriate and based on the availability of vaccine.
- ii. All hospital providers who receive J&J vaccine **shall**, subject to the availability of vaccine supply:
 1. Offer the J&J vaccine to any eligible inpatients being discharged from a hospital admission to a nursing home, assisted living program, or other post-acute care facility (such as a rehabilitation center).
 2. Offer the J&J vaccine to eligible inpatient rehabilitation patients who have longer lengths of stay, but not 3-4 weeks needed for the Pfizer/Moderna second dose to be given before discharge.
 - iii. Further clinical guidance can be found here:
<https://www.fda.gov/emergency-preparedness-and-response/coronavirus-disease-2019-covid-19/janssen-covid-19-vaccine>
 - iv. J&J orders will arrive in the State no earlier than Wednesday.

4. [CovidVax.Maryland.gov](https://www.covidvax.maryland.gov)

- “All providers **who administer vaccines to the general public** shall submit their vaccination site details (vaccine appointment registration webpage and a phone number that directs callers to staff accepting appointment registrations) to john.watson@maryland.gov.”
- All registered COVID-19 vaccine providers in ImmuNet that are offering vaccination clinics will be listed on this page.

5. **Second Doses**

- As vaccine first doses are administered, providers should be able to estimate the number of patients that will require a second dose each week.
- Patients requiring second doses should be prioritized. Providers should manage appointments for second doses based on weekly estimates.
- To the extent possible, a provider shall schedule an individual's second dose at the time of the first dose at the appropriate time interval from the 1st dose. An individual does not need to create a new appointment on their own for the 2nd dose. This dose should be at the same location with the same provider. For more information, please see the [CDC second dose information](#).

- On a weekly basis, providers should review missed appointments or other reasons for scheduled second doses not being used. Further CDC guidance can be found [here](#).
 - **Second doses should not be held or saved for patients who have not returned after 42 days following their first dose; providers may use only those second doses as first doses.**
 - **REMINDER:** A COVID-19 vaccine provider may not use a second dose allocation as first doses for any other reason than outlined in the CDC guidance. They will not be provided with additional doses to cover any 2nd doses used as 1st doses.
- In limited circumstances, an individual will need to schedule a second dose with their local health department under the following circumstances:
 - If the individual has been released from incarceration after getting their first dose;
 - If the individual with a proof of vaccination card has gotten their first dose in another state and has subsequently moved to Maryland; and
 - If the individual has been discharged from a state-operated psychiatric facility.
 - The local health department shall honor these requests for second doses, to the extent permitted by their second dose supply.
 - A state-operated psychiatric facility that admits an individual who has received a first dose shall, to the extent permitted by their second dose supply, provide the second vaccine dose.
 - If the individual has gotten their first dose in the community and has been arrested, the local detention facility should make arrangements with their local health department to provide the second dose, to the extent permitted by the local health department's second dose supply.
- Second-dose orders will be placed on Sundays. Pfizer doses are projected to arrive the following Wednesday. Moderna doses are projected to arrive the following Tuesday. We will perform weekly supply chain tracking and delivery activities with providers to ensure orders are communicated and received appropriately.
- As part of our quality assurance effort, we are working to transition Pfizer to a two-week second dose order cycle to better ensure providers have the second doses they need with as much time as possible to align with the ideal 21-day vaccine delivery window. Moderna will stay at a three-week second dose order cycle, which aligns with the ideal 28-day vaccine delivery window.

6. **Wastage/At-risk Vaccines**

- MDH may reduce the COVID-19 vaccine allocation to any provider or facility that commits or allows wastage of COVID-19 vaccines. For further guidance, please refer to the current [Vaccination Matters Order](#) and/or [Provider Guidance for Avoiding Waste of COVID-19 Vaccine Doses](#) documents (subject to update).
- Providers should report all COVID-19 vaccine wastage and vaccine storage unit temperature excursions to:
<https://www.marylandvfc.org/covid-19-vaccine-excursion-expiration-reporting-form/>.

NOTE: For providers that have received Pfizer: If a provider is unable to access a sixth dose, the sixth dose must be reported as wastage as “other”.

Please review the guidelines before disposing of any COVID-19 vaccine doses.

7. **Transfer of Doses from the Original Provider**

- A provider who has been allocated doses from Maryland may transfer doses to another vaccine provider. The receiving vaccine provider must have completed the CDC provider agreement and the CDC redistribution agreement.
- Providers **must** keep records of what doses have been transferred and **must** complete a transfer request here at:
<https://app.smartsheet.com/b/form/52e75f3d4514499cb0fd7110bd4000a7>
 - The form will ask to/from, date, type (1st or 2nd) and amount.
- If a provider transfers doses, the original provider must ensure the reporting of the doses administered by the receiving provider in ImmuNet.
- MDH will give the exact same 2nd dose amount to the original provider, and they must ensure that the doses are administered to the same people and that those doses are reported.

8. **Additional Local Health Department Guidance**

- Each local health department shall develop and enforce a plan for minimizing wastage of at-risk vaccines for all providers and facilities located in their jurisdiction, consistent with the guidance in Section 6 above (an “anti-wastage plan”) and the [Vaccination Matters Order](#).
- MDH asks that each local health department vaccinate:
 - At least one independent living facility/community a week, in partnership with its local area agency on aging until all identified facilities have completed clinics; and

- At least one congregate living facility for people with disabilities (IDD or BH) or a DDA funded provider which serves individuals with intellectual and developmental disabilities (IDD) a week until all identified facilities have completed clinics.
- We ask that local health departments partner with the Maryland Departments of Aging and Disabilities in order to coordinate the distribution of vaccines.

Further information will be provided as it becomes available. If you have any questions, please contact Andy Owen, MDH Public Information Officer, at andy.owen@maryland.gov.

Appendix 1 - Local Health Department Projected Allocations for Week 21 (5/3/2021), Week 22 (5/10/2021), Week 23 (5/17/2021), and Week 24 (5/24/2021). Note: All doses are a combination of Pfizer, Moderna, and J&J. Changes from last week in **bold**.

Washington County Health Department	--	400
Wicomico County Health Department	--	700
Worcester County Health Department	--	300

Note: FQHCs will have the appropriate second doses ordered to correspond to their first dose orders.

Appendix 4: Priority Group Eligibility

A. Phase 1A (December 14, 2020):

- All licensed, registered, and certified healthcare providers; nursing home residents and staff; law enforcement, firefighters, EMS, and other first responders; correctional healthcare staff and officers; and front line judiciary staff.

B. Phase 1B (January 18, 2021):

- All Marylanders age 75 and over
- All Marylanders of any age in assisted living, independent living, behavioral health and developmentally disabled group homes, and other congregate facilities through Part B of the Federal Long-Term Care Pharmacy Partnership Program.
- All individuals with intellectual and developmental disabilities can begin receiving vaccines as part of Phase 1B. Those who reside in congregate-living facilities will be prioritized. Direct support professionals will be able to receive vaccines in Phase 1C.
- **Education:** (K-12 teachers and support staff, childcare providers, higher education institutions)

- Educational facilities include: licensed childcare facilities; K-12: both public school systems and nonpublic schools; and higher educational institutions.
- Teachers, school staff, and child care workers are defined as those who work in pre-primary, primary, and secondary schools, as well as Head Start and Early Head Start programs (including teachers, staff, and bus drivers) and those who work as or for licensed child care providers, including center-based and family care providers. For more information, please see the [HHS March 2, 2021 Directive](#).
- **Nonpublic schools may not be excluded from any COVID-19 vaccine provider who is administering COVID-19 vaccine to educators.** Any COVID-19 vaccine provider who refuses to vaccinate nonpublic school staff while administering vaccines to public school system employees will have future vaccine allocations reduced or reallocated.
- Each educational facility shall:
 - Identify a clinical provider (e.g., hospitals, FQHCs, others) that is registered with ImmuNet for COVID-19 vaccine administration. **If no provider is identified, then the local health department will be the default vaccinator of that facility through one of their general population clinics and the local health department’s vaccine allocation.**
 - We encourage each educational facility and their clinical provider to coordinate with each local health department on their vaccine administration plan for vaccine allocations.
 - An educational facility’s clinical provider may submit a vaccine allocation request to the state and identify the number of staff that needs to be vaccinated.
 - **Note:** Due to the limited supply of vaccine, Maryland does not anticipate significantly fulfilling any specific educational vaccine requests until a majority of Marylanders over age 65 are vaccinated.
- **Note:** Higher Education Institutional front-line workers with potential contact with students living in residence halls (congregate living), facilities maintenance, dining hall, and campus police are included in 1C.
- Each educational facility shall prioritize its faculty, staff, and students by the following:

- (A) Faculty or staff that provide essential in-person learning (i.e. instruction that cannot be delivered remotely);
- (B) Individuals with essential functions related to facility/campus operations;
- (C) Individuals that require residential or on-campus housing;
- (D) or that meet an existing priority group in Phase 1A or 1B currently.

- **Continuity of Government:**

- Local elected officials should be prioritized as extra doses become available by the relevant local health departments.
- All federal law enforcement agencies should coordinate with the Maryland State Police on their needs.
- All federal non-law enforcement agencies should consider implementing their continuity of operations plans (COOP) and request the relevant doses from FEMA.
- All local government (at the county and municipal levels) agencies shall coordinate with their local health department on vaccination priorities. As extra doses become available, local health departments should vaccinate those agencies with a focus on the continuity of government operations.
- All other state agencies should follow the January 25, 2021 DBM guidance.
- Each local health department should work with the administrative judges (district and circuit) in their jurisdiction to prioritize and vaccinate judicial personnel that are non-frontline using their jurisdiction's allocated doses.

C. Phase 1C (January 25, 2021)

- All Marylanders over 65.
- All other public safety (not in Phase 1A)
- All other healthcare (not in Phase 1A), including, but not limited to, Lab Services, Public Health, Vaccine Manufacturing, other healthcare professions
- Food and Agriculture Production
- Critical Manufacturing

- U.S. Postal Service
- Public Mass Transit
- Grocery Stores
- Veterinarians and Support Staff
- Clergy and other essential support for houses of worship
- Certain immunocompromised individuals who are currently receiving hospital-based treatment, including in hospital outpatient centers AND diagnosed with at least one of the following conditions:
 - Cancer patients who are currently in active treatment
 - End stage renal disease patients requiring hemodialysis
 - Chronic Obstructive Pulmonary Disease (COPD)
 - Solid organ transplant recipients
 - Sickle cell disease patients
 - Diabetic patients (Type 1 and Type 2)
- Hospital-based health care providers should work with the clinics within their hospital that manage the care of these patients to vaccinate these individuals.
- Maryland will make its best efforts to ensure that every hospital will receive at least 100 doses for these immunocompromised individuals.
- Note: for more information on the groups defined in Phase 1C above, please see the [U.S. Department of Homeland Security's Critical Infrastructure Workers' Advisory Memorandum \(December 16, 2020\)](#).

D. Phase 2A (Tuesday, March 23, 2021)

- All Marylanders 60 and older.

E. Phase 2B (Tuesday, March 30, 2021)

- All Marylanders 16 and older with medical conditions that are at an increased risk for severe COVID-19 illness.
- Note: A list of qualifying medical conditions as defined by the CDC can be found [here](#). Individuals may want to consult with their doctors to determine their individual risk.

- All Marylanders 16 and older with disabilities receiving Supplemental Security Income (SSI) or Social Security Disability Insurance (SSDI) benefits, Maryland Medicaid Employed Individuals with Disabilities (EID) individuals, Maryland Medicaid Rare and Expensive Case Management (REM) recipients; Marylanders receiving Temporary Disability Assistance Program (TDAP) benefits, or Marylanders receiving long term services and supports through the state's Medicaid waiver and state plan services.

F. Phase 2C (Monday, April 12, 2021)

- All Marylanders 55 and older
- All essential workers in critical industries, including
 - Construction workers,
 - Food services,
 - Utilities,
 - Transportation,
 - Financial services, and
 - Information Technology.
- Note: for more information on the groups defined in Phase 2C above, please see the [U.S. Department of Homeland Security's Critical Infrastructure Workers' Advisory Memorandum \(December 16, 2020\)](#)

G. Phase 3 (Monday, April 12, 2021)

- All Marylanders 16 and older.
